# Joshua Gangadeen

UX/UI Designer | Toronto, ON

A UX/UI designer with a strong passion for creating engaging digital experiences. What I love most about being a product designer is creating intuitive interfaces that resonate with users.

## Work

### UX Designer | Methodify by Schlesinger Group | 2022 - Current

- Worked in an agile environment in 4 week sprints to design multiple features at once in a timely manor
- Took the lead on sprint kick-offs, created design briefs and laid out appropriate design strategy to ensure a smooth sprint
- Rapidly created user stories and prototypes for usability testing and project handoff
- Constant collaboration with devs, design team and stake holders to align project goals
- Organized, maintained and contributed to the company design system
- Ensured platform is compliant with web accessibility guidelines
- Actively iterated designs based on feedback from users, developers, the design team, and stake holders

## Projects

### Tato - Tattoo app

- Gathered a solid foundation of comprehensive research to develop a strong hypothesis for the app to be built upon
- Studied potential users through interviews and usability testing
- Increased design fidelity from low, mid, to high fidelity interactive prototypes
- Presented, organized and visualized research data into infographics, charts, and personas to aid design choices
- Adapted to Material Design for both mobile and desktop to increase user familiarity

### Word box - Vocabulary building app

- Developed a competitive analysis to highlight areas where Word Box could improve
- Created user personas using data collected from interviews to identify user needs, goals, behaviors and pain points
- Created user task flows, and prototypes to conduct usability tests with participants
