

JOSHUA GANGADEEN

UX/UI DESIGNER | TORONTO, ON

PROFILE

A UX/UI designer with a passion for prototyping, usability testing, and finding new methods to collect useful data. What I love most about UX design is utilizing my research to create a solid efficient and intuitive design.

PROJECTS

TATO - TATTOO APP

- Established a solid foundation of research and developed a hypothesis for the app to be built upon.
- Collaborated with potential users for interviews and usability testing.
- Iterated from low, mid, to high fidelity prototypes.
- Organized and presented research data into usable charts, personas, and presentations.
- Adapted to Material Design standards.

NEXTDOOR - REDESIGN

- Analyzed the existing app and created a plan to improve on it both visually and functionally.
- Created a style guide, layout grids, established font hierarchies, chose the color palette, and modernized Nextdoor's overall theme.
- Created a smooth responsive mobile first design to be used across all devices.
- Special attention to file naming, and organization.

WORD BOX - VOCABULARY BUILDING APP

- Researched competitor apps to identify pros, cons and opportunities where Word Box can improve on.
- Created user personas from interviews to identify user needs, goals, behaviours and pain points.
- Created user task flows, and basic prototypes to conduct usability tests with participants.
